(a) Revenue

For FYE 2022, the Group recorded a revenue of RM777.9 million, which was RM214.5 million or 38.1% higher than the previous financial year. The better performance was mainly due to higher average selling prices as a result of the increase in raw material costs.

Export sales contributed about 38.1% of the total revenue whilst the balance is from the local market which is in line with the Group's strategy in maintaining its leading market position in Malaysia.

Our Group's revenue based on geographical location of our customers are as follows:

	FYE 2022 RM'000	FYE 2021 RM'000	Change	
			RM'000	%
South East Asia other than Malaysia	182,149	141,041	41,108	29.1%

Total revenue	777,908	563,437	214,471	38.1%

The Aluminium Segment was the sole contributor to the Group's revenue for FYE 2022 as the Property Segment was still in the midst of project planning during the financial year.

(b) Profit before tax

The Group reported a significant increase in profit before tax ("PBT") of 72.3% for FYE 2022 as compared to RM12.2 million in the previous financial year. The increase was contributed by the aluminium segment.

Aluminium Segment

The Aluminium Segment's PBT for the current financial year increased by RM10.1 million or 67.3% to RM25.2 million due mainly to higher revenue as well as improved margins.

MANAGEMENT DISCUSSION AND ANALYSIS

REVIEW OF GROUP'S FINANCIAL RESULTS AND FINANCIAL CONDITIONS (CONTINUED)

(b) Profit before tax (Continued)

Property Segment

However, the property segment reported a higher loss before tax of RM4.2 million compared to RM2.9 million for the previous financial year. The higher loss from the property segment is due mainly to interest expenses.

These figures were achieved despite unprecedented headwinds of Covid-19, surge in the material prices, high energy costs and supply chain disruptions.

(c) Profit after tax

The Group reported an increase in profit after tax of RM6.8 million or 82.3% to RM15.1 million in the current financial year compared to the previous financial year, which is in line with the higher profit before tax.

Despite the volatility of raw material costs and the exchange rate of MYR against the USD, the Group was able to remain profitable and recorded a positive Earnings Before Interest, Tax, Depreciation and Amortisation ("EBITDA") of RM30.8 million for FYE 2022.

(d) Earnings per ordinary share

Basic and diluted earnings per ordinary share were 10.67 sen and 10.64 sen respectively for the current financial year compared to 6.01 sen and 5.98 sen for the previous financial year.

(e) Financial position

(i) Total Assets

The Group's total assets increased by RM38.4 million or 13.5% to RM323.3 million compared to RM284.9 million in FYE 2021 due mainly to the increase in property, plant and equipment and trade and other receivables. The property, plant and equipment of the Aluminium Segment increased by RM13.5 million or 28.8% from RM46.8 million to RM60.3 million due mainly to the cost of upgrading of existing plant and machinery and acquisition a piece of land. Trade and other receivables also increased by RM12.7 million or 33.7% to RM50.5 million compared to RM37.7 million in FYE 2021 in tandem with the higher revenue.

The Group's cash position including short-term fund, fixed deposits as well as cash and bank balances was RM37.1 million for FYE 2022 (FYE 2021: RM31.2 million).

(ii) Total Liabilities

Meanwhile, the Group's total liabilities also increased by RM25.3 million or 18.2% to RM164.7 million in FYE 2022 from RM139.4 million as at the end of the last financial year due mainly to the increase in Aluminium Segment's trade and other payables. The trade payables increased significantly due to higher raw materials costs amid the rise in global aluminium prices in March and April 2022.

For the Property Segment, the Group's advances received from related parties also increased by RM3.8 million to RM15.6 million (FYE 2021: RM11.8 million) during the financial year.

(iii) Gearing ratio

The Group's gearing ratio had decreased from 46.3% to 39.4% in FYE 2022. This was due mainly to the increase in retained earning contributed by the Aluminium Segment.

The Group's capital management strategy is to focus on maintaining a low and healthy gearing ratio whilst creating and maximising shareholders' value. By having a healthy gearing ratio, the Group will be able to place itself in a better position to capture new business opportunity and withstand any economic adversities.

MANAGEMENT DISCUSSION AND ANALYSIS

CAPITAL EXPENDITURE

The Group's estimated total CAPEX for the financial year ending 31 July 2023 ("FYE 2023") is RM13.4 million, of which its breakdown is shown below:

Asset Group	Main usage	Amount RM'000
Plant and machinery	Install new solar panel, new scrap segregation machine and upgrade of existing facilities	13,235
Others		200
Total CAPEX for FYE 2023		13,435

The Group expects the installation of the new solar panel project with 1.5 MWp capacity and new scrap segregation machine to be completed in FYE 2023 for the Aluminium Segment. The capital expenditure requirement will be financed through internally generated funds.

ANTICIPATED BUSINESS RISKS

The Group is subject to the usual commercial risks and uncertainties from operations that may potentially affect the operating performance of the Group. A number of these potential risks and uncertainties that could have a material adverse effect on the business, financial position and the results of the operations of the Group, are as follows:

(a) Market competition

The Group is principally involved in the manufacturing and marketing of aluminium billets catering to aluminium extruders.

The Group continues to experience competition from other local competitors but believes that its ability to compete depends upon many factors including market acceptance of the product quality, competitive pricing and reliable delivery schedule.

In addition, local manufacturers of aluminium billets also compete directly with importers as no tariff is levied on imported aluminium billets in Malaysia.

However, the Group believes it has an edge over its competitors in that it is able to provide flexibility in deliveries to its customers as well as its ability to produce high quality aluminium billets which in turn, further improve the efficiency and cost structure of aluminium extruders.

(b) Volatility in raw material prices

The Group's primarily raw materials is aluminium ingots, a commodity traded on the London Metal Exchange ("LME"), and its price is dependent upon global demand and supply situation. A shortage of supply may lead to price increase of these raw materials. The Group endeavours to maintain long-term relationships with suppliers to ensure consistent and reliable deliveries and also to obtain its purchases at competitive rates. With regards to the prices, the Group expects to be able to pass on any increase in the cost to its customers, as the orders from customers are priced back-to-back with that of its suppliers, thus reducing the risk of price volatility.

MANAGEMENT DISCUSSION AND ANALYSIS

ANTICIPATED BUSINESS RISKS (CONTINUED)

(c) Volatility in currency exchange rates

Aluminium ingots are imported and priced in USD thus subjecting the Group to currency exchange risk. However, the Group's exports are denominated in USD which serve as a natural hedge for its USD requirements hence mitigating the currency exchange risk. In addition, the Group also expects to be able to pass on the fluctuation in USD movement, if any, to its local customers via back-to-back orders and pricing arrangements to further reduce its exposure to currency exchange risk.

(d) Political and economic instability

The Group operates mainly in Malaysia, deriving approximately 62% of its total revenue for the current financial year from domestic sales. The performance of the Group is significantly dependent upon the stability of the local political climate as well as the resilience of the Malaysian economy.

The Group pays close attention to the development of the local political and economic conditions to detect any potential downside risk as well as to take preventive measures to mitigate the impact of such risks.

(e) Execution risk for property development projects

The Group's property development business comprises its investments in non-wholly owned subsidiaries. The delay in completion of any property development project will result in liquidated ascertained damages payable to the house buyers which will adversely affect the Group's profits as well as cash flows.

The Group works closely with its business partners to operate and manage the property development projects to ensure on-time completion. The business partners have a proven track record in the Malaysian property development industry for many years.

(f) Weak sentiments for property market

Rising inflations, interest rate hikes by the Malaysian central bank, and uncertainties over business recovery have disrupted the recovery momentum of the domestic property market post-pandemic. The slow recovery of the property market is evidenced by the high residential property overhang at the end of the first quarter of 2022. In addition, developers of new projects are facing challenges including labour shortage, volatility of building material costs, and the uncertainty of a resurgence of Covid-19 cases.

The Group works closely with its business partners on the viability of future projects, including the property types, pricing, and the timing of the new launches. As the Group's land banks earmarked for property development are located at strategic locations in Kuala Lumpur, the Group is optimistic that with proper planning and right strategy execution, the future launches should achieve a satisfactory take-up rates.

MANAGEMENT DISCUSSION AND ANALYSIS

OUTLOOK

The global outlook has deteriorated markedly throughout 2022 amid high inflation, aggressive monetary tightening, and uncertainties from both the war in Ukraine and the lingering pandemic. Soaring food and energy prices are eroding real incomes, triggering a global cost-of-living crisis, particularly for the most vulnerable groups. Growth in the world's three largest economies, United States, China, and European Union is weakening, with significant spillovers to other countries. At the same time, rising government borrowing costs and large capital outflows are exacerbating fiscal and balance of payments pressures in many developing countries. Against this backdrop, the global economy is now projected to grow between 2.5% and 2.8% in 2022, a substantial downward revision from the previous forecasts released in January and May 2022. While the baseline forecast for 2023 is highly uncertain, most forward-looking indicators suggest a further slowdown in global growth.

The Malaysian economy registered a strong growth of 8.9% in the second quarter of 2022 (1Q 2022: 5.0%). While growth was lifted to some extent by the low base from the Full Movement Control Order in June 2021. The growth in April and May 2022 was particularly robust, underpinned by the continued recovery in labour market conditions and policy support. The improvement also reflected normalising economic activities as the country moved towards endemicity coupled with the reopening of international borders. However, the ringgit depreciated by 4.6% against the US dollar (1Q 2022: -0.7%), in line with the movement of regional currencies. The strengthening of the US Dollar against the Malaysia Ringgit could translate into better Group export margins.

On the other hand, the weakened Ringgit Malaysia will escalate the costs of doing business domestically arising from pricier imports. The volatility of both aluminium prices and currencies continue to add uncertainties to our decision making process, particularly on pricing whilst the overall increase in costs of doing business in Malaysia will have adverse impacts on the Group's margins.

The Group will continue to monitor the development of the Covid-19 pandemic including adopting cost-cutting measures to mitigate against any potential impact on the financial position and operating results of the Group.

Moving forward, while initial concerns are beginning to dissipate, the outlook will largely hinge on evolving Covid-19 developments and the pace of economic recovery. At this juncture, there are limited risks of a broad-based and persistent decline in prices, with price pressures on an upward trend since the gradual reopening of the economy.

Barring unforeseen circumstances, the Board is optimistic that the Group will remain profitable for the forthcoming year.

In ensuring that independent judgments are not compromised, the Board will carry out an assessment of independence of the Independent Directors annually and taking into account of the individual Director's ability to exercise its independent judgment at all times and contribution to the effective functioning of the Board.

Based on the assessment conducted for the financial year ended 31 July 2022, the Board is satisfied with the level of independence demonstrated by the Independent Directors and their ability to act in the best interest of the Group.

IV. REMUNERATION COMMITTEE (CONTINUED)

Remuneration policy and procedures for Directors and Senior Management

The Board via the RC, implements the policies and procedures on the recommendation and review of the remunerations for Board members and Senior Management.

The Board believes that competitive remunerations enable the Company to attract, retain and motivate the Directors and Senior Management. The remuneration packages are aligned to corporate objectives and take into consideration the complexity of the Company's business operations with reference to an individual's responsibilities and achievements. Additionally, the Board also ensure that remunerations and incentives for Independent Directors are not in conflict with their obligations to bring objectivity, professionalism and independence of opinions on matters discussed at Board meetings.

RC is responsible for recommending the remuneration framework for Directors as well as the remuneration packages of Executive Directors to the Board. None of the Executive Directors participate in any way in determining their individual remuneration. The Directors of the Company, who are also shareholders, had abstained from voting on the resolutions, in respect of their direct and indirect shareholdings, approving the payment of Directors' fees and benefits at the previous AGM held on 8 December 2021.

The Managing Director and Executive Directors are responsible to determine the remuneration package of the Senior Management, with reference made to remuneration packages of similar positions in comparable companies within the industry.

The remuneration packages of the Executive Directors and Senior Managements are structured in a way to link rewards to the performance of the Company as well as individual performance.

Disclosure of remuneration - Directors

The remuneration package for Directors comprises the following elements:

- Fees and Meeting Allowance

The fees payable to each of the Directors are determined by the Board. All Directors are paid meeting allowances as determined by the Board as reimbursement for expenses incurred for attending the Board meetings. The fees and meeting allowance payable to the Directors will be recommended by the Board for approval by shareholders at the forthcoming Annual General Meeting scheduled to be held on 7 December 2022.

- Basic Salaries and Bonuses

The basic salaries and bonuses for the Executive Directors are recommended by the RC to the Board for approval. Bonus is a performance-based payment linked to corporate performance as well as individual performance.

- Benefits-in-kind

Customary benefits such as share options, motor vehicle and mobile phone allowance are made available to the Directors in accordance with the policies of the Group.

The details of the remuneration of Directors of the Group and of the Company for the financial year ended 31 July 2022 are disclosed on a named basis in the CG Report.

To this end, we work closely with our customers in enhancing and modifying our products and processes according to the customers' specific needs and conditions.

(ii) Quality

Our Quality Management System ("QMS") was established and tailored to the ISO 9001: 2015 requirements, which is applicable to the manufacture of aluminium billets. To strengthen the system and compliance of all quality procedures, we have established an efficient and effective internal audit team for assessing the QMS periodically.

(iii) Service

We have implemented a feedback system on the availability of person in-charge, customer requests, technical information and response to problem solving. Both complimentary and constructive feedback are communicated, and action plans are devised in areas where improvements are required. Other than the annual surveys that we conduct, our Sales and Marketing team remains in regular contact with our customers to ensure that any issues are addressed in a timely manner.

(iv) On-time Delivery

On-time Delivery affects every aspect of our business and dictates the efficiency of the supply of raw materials and the production process. Our on-time delivery process is based on the monitoring of customers' expected delivery date and shipment schedule. Thus, we have allocated measures and resources from the sourcing of raw materials to the prompt delivery of our products. Each step of our quality objectives process is accounted for; that is, we have determined the required actions and resources as well as the measurement methods. All department's roles and responsibilities are clearly defined to meet deadlines and keep lines moving.

(c) Suppliers

The Group respects its suppliers and works closely with them through long-term relationships to realise mutual growth based on mutual trust.

Transparency and Integrity

As stated in the Code of Conduct and Ethics for Directors and Employees, purchasing activities in our supply chain shall be carried out with transparency, integrity and honesty. The Group prohibits the acceptance of extravagant gifts, favours, entertainment or services that may influence the recipient's job performance and responsibilities.

Mutual Growth

The Group values and works jointly with its suppliers to develop long-term relationships that will lead to mutual growth based on mutual trust. In partnership with suppliers, we continuously enhance the supply chain for the purpose of meeting our customers' expectations and needs. We develop and maintain good relationships with suppliers that form one of the significant factors in building a sustainable supply chain.

All procurement activities are guided by our documented procedures as prescribed by the ISO 9001:2015 Quality Management System to ensure that our suppliers comply with our purchase material specifications and satisfy our production requirements. To ensure the compliance practices of our suppliers, we evaluate the performance of our suppliers on a biannual basis in terms of the quality of products and services, pricing, packaging, delivery and product safety criteria. Meanwhile, for potential suppliers, our selection criteria are focused on quality and sustainable sources, pricing and delivery performance.

ENVIRONMENTAL

Environmental sustainability has become of paramount importance because of the worsening depletion of the earth's natural resources, on which everyone relies on. Therefore, we believe that *"Protecting the Environment Is Our Shared Responsibility"*.

Minimise Environmental Impact Operation

The Group contributes to environmental preservation in a unique way by supporting customers in using recycled aluminium, which reduces the usage of virgin raw material.

At A-Rank, we espouse environmental sustainability principles in our business and operations. To this end, we have initiated several programmes and measures.

Our Environmental Policy is the guiding principle in our commitment to environmental stewardship and in our endeavour to operate in harmony with the environment.

Environmental Management

We have established an Environmental Performance Monitoring Committee tasked with identifying roles and responsibilities as well as advocating for environmental measures, so that we can implement appropriate strategies to manage our air emissions and waste from all our facilities. In addition, this Committee ensures the seamless connectivity amongst all relevant departments in dealing with environmental issues particular to our operation.

Environmental Awareness and Training

Environmental training is critical in increasing the knowledge of our employees and in better understanding the environmental regulatory issues that affect the organisation, both of which will aid our compliance with rules and regulations.

The table below shows the environmental trainings conducted during the financial year ended 31 July 2022:

Training Topic	Number of Attendees	Number of days
Course for Certified Environmental Professional in Bag Filter Operation	2 persons	5 days / person
Hazard Identification, Risk Assessment & Impact Control of Hazardous Wastes	2 persons	2 days / person

Energy Management

"We drive down our energy consumption by investing in modern technologies..."

Our energy-saving initiative is focused on the melting and homogenising operations, as these are energy-intensive processes. In pursuing this, we have collaborated with an electrical monitoring vendor to install detection devices to study the power consumption pattern of our homogenising furnaces so as to provide solutions to optimise furnaces handling and to minimise power consumption.

The high-capacity melting furnaces are linked to heat-generating burners. In this way, the harnessed waste heat is returned to the process, thereby reducing energy consumption. On the other hand, the hydraulically tilting holding furnace controls the melt temperature, consequently decreasing energy consumption and improving product quality and productivity.

Below are the details of our energy consumption in the past five (5) financial years:

	Diesel (Litres)	Natural Gas (MMBtu)	Electricity (KwH)
FYE 31.07.2018	218,400	479,089	12,749,865
FYE 31.07.2019	229,320	469,909	12,783,297
FYE 31.07.2020	207,480	425,553	12,206,029
FYE 31.07.2021	207,480	490,509	13,015,850
FYE 31.07.2022	207,480	480,599	13,003,844

An electricity management team was formed in February 2020 with the objectives to identify and reduce electricity wastage and improve the overall efficiency of electricity usage. The team has initiated the energy management by engaging an energy monitoring system supplier to install a real time energy monitoring system in homogenising furnaces where electricity consumption is the most significant. The data collected will be analysed for further efficiency improvement actions.

Waste Management

The Group monitors the disposal of wastes and the performance of the licensed waste contractors. We also promote environmental awareness and training amongst employees. Additionally, we ensure that scheduled waste such as aluminium dross, contaminated gloves and hazardous materials are disposed of to the licensed contractors for further recycling, recovery and landfill.

Our ongoing efforts to reduce waste consists of:

- investment in better technology such as magnetic stirrer;
- ensure that the aluminum recovery process proceeds through every aluminum melting lot; and
- monitoring of Monthly Dross Generation and Analysis of Aluminum Recovery Rate on a monthly basis.

Air Emission

It is extremely important to control our point-source pollution, which affects the quality of air. To this end, we have invested substantially in dust control systems to ensure that cleaner air is discharged into the environment.

Solar Energy

We are constantly exploring the use of renewable energy to reduce production cost as well as to minimise the energy-related environmental damage caused by fossil fuels. At present, purchased electricity and fuels (diesel, natural gas and liquefied petroleum gas) are our main energy sources. The initiative to transition towards solar energy will reduce our dependency on fossil fuels and at the same time increase our commitment towards environmentally friendly renewable energy sources.

Subsequent to the financial year ended 31 July 2022, the Group had placed an order for a solar photovoltaic rooftop project with a total capacity of 1.5MWp to be installed at our Beranang factory which is expected to be completed by early 2023.

Environmental Compliance

We are committed to comply with and operate in accordance with the relevant environmental laws and regulations. The Environmental Performance Monitoring Committee is responsible for implementing and monitoring the effectiveness of our environmental policy as well as for formulating additional policy elements as deemed necessary.

The environmental regulations that specifically apply to the Group are:

- Environmental Quality Act 1974;
- Environmental Quality (Clean Air) Regulations 2014; and
- Environmental Quality (Scheduled Wastes) Regulations 2005.

The Outsourced Internal Auditors will report directly to Audit Committee on the key risk related issues and the Audit Committee shall report to the Board on the status of the risk management process. Risk registers of the principal risks and controls have been created and a risk profile for the Group has been developed and reviewed by the Board and Audit Committee.

During the financial year 31 July 2022, two (2) RMC meetings were held which were attended in full by all members of the Committee. INDEPENDENT AUDITORS' REPORT

TO THE MEMBERS OF A-RANK BERHAD
(Incorporated in Malaysia)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

We have audited the financial statements of A-Rank Berhad, which comprise the statements of financial position as at 31 July 2022 of the Group and of the Company, and the statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Group and of the Company for the financial year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages 78 to 129.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Group and of the Company as at 31 July 2022, and of their financial performance and their cash flows for the financial year then ended in accordance with Malaysian Financial Reporting Standards ("MFRSs"), International Financial Reporting Standards ("IFRSs") and the requirements of the Companies Act 2016 in Malaysia.

Basis for Opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence and Other Ethical Responsibilities

We are independent of the Group and of the Company in accordance with the *By-Laws (on Professional Ethics, Conduct and Practice)* of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the Group and of the Company for the current financial year. These matters were addressed in the context of our audit of the financial statements of the Group and of the Company as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

(a) Carrying amount of inventories at the lower of cost and net realisable value

As at 31 July 2022, the carrying amount of inventories of the Group, which comprised aluminium products was RM89,755,215. Details of the inventories, are disclosed in Note 11 to the financial statements.

We have focused on the audit risk that the carrying amount of inventories may not be stated at lower of cost and net realisable value. Writing down of inventories to net realisable value is mainly based on management estimates, which have been derived from estimates of selling prices that are subject to price volatility of aluminium and if not accounted for properly, may lead to the valuation of inventories being misstated.

Audit response

Our audit procedures included the following:

- (i) compared the net realisable values determined by management against the movements of world aluminium prices; and
- (ii) tested inventories for sales subsequent to the year end to supporting documentation and assessed that the carrying amount of inventories is at the lower of cost and net realisable value.

**INDEPENDENT AUDITORS' REPORT
TO THE MEMBERS OF A-RANK BERHAD
(INCORPORATED IN MALAYSIA)****REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)****Key Audit Matters (continued)****(b) Impairment assessment and classification of amounts owing by subsidiaries**

As at 31 July 2022, gross amounts owing by subsidiaries of the Company and which have been classified as current assets were RM23,985,729 and non-current assets were RM7,598,505 as disclosed in Note 10 to the financial statements.

We have focused on the audit risk that carrying amount of amounts owing by subsidiaries may not be recovered. Assessment on recoverability of amounts owing by subsidiaries requires management to exercise significant judgement in determining the probability of default by subsidiaries, significant increase in credit risk and the classification of amounts owing by subsidiaries that are repayable on demand as current assets.

Audit response

Our audit procedures included the following:

- (i) recomputed the probability of default using historical data and forward-looking information adjustment;
- (ii) assessed the appropriateness of the indicators of significant increase in credit risk applied by management and the resultant basis for classification of balances into respective stages;
- (iii) assessed actual loss events subsequent to the end of reporting period for its relationship with the indicators of significant increase in credit risk applied by management; and
- (iv) evaluated the appropriateness of the classification of amounts owing by subsidiaries as current assets based on the arrangements put in place by management for the settlement of these balances.

INFORMATION OTHER THAN THE FINANCIAL STATEMENTS AND AUDITORS' REPORT THEREON

The Directors of the Company are responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements of the Group and of the Company and our auditors' report thereon.

Our opinion on the financial statements of the Group and of the Company does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF THE DIRECTORS FOR THE FINANCIAL STATEMENTS

The Directors of the Company are responsible for the preparation of financial statements of the Group and of the Company that give a true and fair view in accordance with MFRSs, IFRSs and the requirements of the Companies Act 2016 in Malaysia. The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements of the Group and of the Company that are free from material misstatement, whether due to fraud or error.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF A-RANK BERHAD (INCORPORATED IN MALAYSIA)

RESPONSIBILITIES OF THE DIRECTORS FOR THE FINANCIAL STATEMENTS (CONTINUED)

In preparing the financial statements of the Group and of the Company, the Directors are responsible for assessing the ability of the Group and of the Company to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Company or to cease operations, or have no realistic alternative but to do so.

AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control of the Group and of the Company.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- (d) Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group or of the Company to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Company to cease to continue as a going concern.
- (e) Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Company, including the disclosures, and whether the financial statements of the Group and of the Company represent the underlying transactions and events in a manner that achieves fair presentation.
- (f) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial statements of the Group. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF A-RANK BERHAD (INCORPORATED IN MALAYSIA)

AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and of the Company for the current financial year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

In accordance with the requirements of the Companies Act 2016 in Malaysia, we report that the subsidiaries of which we have not acted as auditors are disclosed in Note 8 to the financial statements.

OTHER MATTERS

This report is made solely to the members of the Company, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.

- (a) The Group lease a number of plant and machinery and motor vehicles in the locations, which it operates with fixed periodic rent over the lease term.
- (b) The right-of-use assets are initially measured at cost, which comprise the initial amount of the lease liabilities adjusted for any lease payments made at or before the commencement date of the leases.

Total cash outflows for leases	1,502,208	1,481,208

(f) Lease liabilities are denominated in RM.

(g) The following table sets out the carrying amounts, the weighted average incremental borrowing rate and the remaining maturity profile of the lease liabilities of the Group at the end of the reporting period based on contractual undiscounted repayment obligations of the lease liabilities that are exposed to interest rate risk:

Group	Weighted average incremental borrowing rate %	On demand or within one year RM	One to two years RM	Two to five years RM	Total RM
2022					
Lease liabilities	5.79	1,464,400	-	-	1,464,400
2021					
Lease liabilities	6.65	276,000	253,000	-	529,000

(h) Management exercises judgement in determining the incremental borrowing rate whenever the implicit rate of interest in a lease is not readily determinable as well as the lease term. The incremental borrowing rate used is based on a prevailing market borrowing rate over a similar lease term, of similar value as the right-of-use asset in a similar economic environment. Lease term is based on management expectations driven by prevailing market conditions and past experiences in exercising similar renewal and termination options.

NOTES TO THE FINANCIAL STATEMENTS

31 JULY 2022

10. TRADE AND OTHER RECEIVABLES (CONTINUED)

- (c) Impairment for trade receivables that do not contain a significant financing component are recognised based on the simplified approach using the lifetime expected credit losses.

The Group has established a provision matrix that is based on its historical credit loss experience, adjusted to reflect current and forward-looking information on macroeconomic factors in Malaysia such as consumer price index, lending interest rate and non-performing loan (2021: consumer price index, lending interest rate and non-performing loan) affecting the ability of the consumers to settle the receivables. Expected loss rates are calculated using the roll rate method separately for exposures in different segments based on common credit risk characteristic, namely receivables aging status.

During this process, the probability of non-payment by the trade receivables is adjusted by forward-looking information and multiplied by the amount of the expected loss arising from default to determine the lifetime expected credit loss for the trade receivables. For trade receivables, which are reported net, such impairments are recorded in a separate impairment account with the loss being recognised in the consolidated statements of profit or loss and other comprehensive income. On confirmation that the trade receivable would not be collectible, the gross carrying value of the asset would be written off against the associated impairment.

It requires management to exercise judgement in determining the probability of default by trade receivables and appropriate forward-looking information and significant increase in credit risk.

In assessing whether the credit risk has increased significantly since initial recognition, the Group compares the risk of a default occurring at the reporting date with the risk of a default occurring at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

- (d) The loss allowance of trade receivables of the Group are as follows:

	Gross carrying amount RM	Loss allowance RM	Net balance RM
2022

10. TRADE AND OTHER RECEIVABLES (CONTINUED)

- (h) Non-current amounts owing by subsidiaries of the Company represent the present value of advances, which are unsecured, bear interest at 3.4% (2021: Nil) per annum and are not repayable within the next twelve (12) months.

The fair value of non-current amounts owing by subsidiaries are estimated by discounting expected future cash flows at the market incremental borrowing rate for similar types of lending. The carrying amounts of the non-current amounts owing by subsidiaries are reasonable approximations of their fair values.

Current amounts owing by subsidiaries represent advances and payments made on behalf, which are unsecured, bear interest at 3.4% (2021: Nil) per annum and payable within the next twelve (12) months in cash and cash equivalents.

Amount owing by an associate represents advances and payments made on behalf, which are unsecured, interest-free and payable within the next twelve (12) months in cash and cash equivalents.

- (i) Impairment for other receivables, amounts owing by subsidiaries and an associate are recognised based on the general approach within MFRS 9 using the forward-looking expected credit loss model. The methodology used to determine the amount of the impairment is based on whether there has been a significant increase in credit risk since initial recognition of the financial asset. For those in which the credit risk has not increased significantly since initial recognition of the financial asset, twelve-month expected credit losses along with gross interest income are recognised. For those in which credit risk has increased significantly, lifetime expected credit losses along with the gross interest income are recognised. As at the end of the reporting period, the Group and the Company assess whether there has been a significant increase in credit risk for financial assets by comparing the risk for default occurring over the expected life with the risk of default since initial recognition. For those that are determined to be credit impaired, lifetime expected credit losses along with interest income on a net basis are recognised.

The Group defined significant increase in credit risk based on operating performance of the other receivables, changes to contractual terms, payment delays and past due information. A significant increase in credit risk is presumed if contractual payments are more than 90 days after credit term.

The probabilities of non-payment by other receivables, amounts owing by subsidiaries and an associate are adjusted by forward-looking information such as consumer price index, lending interest rate and non-performing loan (2021: consumer price index, lending interest rate and non-performing loan) and multiplied by the amount of the expected loss arising from default to determine the twelve month or lifetime expected credit loss for other receivables, amounts owing by subsidiaries and an associate.

It requires management to exercise judgement in determining the probabilities of default by other receivables, amounts owing by subsidiaries and an associate, appropriate forward-looking information and significant increase in credit risk.

- (j) No expected credit loss is recognised arising from other receivables other than amount owing by associate as it is negligible.
- (k) Included in prepayments of the Group are advance payments to overseas suppliers amounting to RM5,950,092 (2021: RM8,398,486).
- (l) The Group determines concentration of credit risk by monitoring its trade receivables on an ongoing basis. At the end of each reporting period, approximately 51% (2021: 68%) of the trade receivables of the Group were due from five (5) (2021: five (5)) major customers.

At the end of each reporting period, 99% (2021: 98%) and 0.4% (2021: 2%) of the receivables of the Company were owing by subsidiaries and an associate respectively.

Property development expenditure not recognised as an expense are recognised as an asset measured at the lower of cost and net realisable value.

Property development expenditure comprise all costs that are directly attributable to the development activities or that can be allocated on a reasonable basis to such activities. Such development expenditure comprises the cost of land under development and other related development costs common to the whole project including professional fees and other relevant levies.

Property development land of a subsidiary with carrying amount of RM70,485,560 (2021: RM70,485,560) is charged as a security for term loan granted to the subsidiary as disclosed in Note 17(c) to the financial statements.

- (b) Inventories costs of aluminium products are determined on a first-in, first-out basis.
- (c) Carrying amount of inventories at the lower of cost and net realisable value for aluminium products.

Write-down of inventories for aluminium products to net realisable value, if any, is mainly based on management's estimates, which have been derived from expectation of current market prices and future demand.

Management focused on the risk that the carrying amount of inventories may not be stated at the lower of cost and net realisable value. Writing down of inventories to net realisable value requires the management to exercise significant judgement, which have been derived from estimates of selling prices that are subject to price volatility of aluminium, and if not accounted for properly, may lead to the valuation of inventories being misstated.

In estimating the net realisable value of the inventories, the management considers the inventories' ageing, the general economic conditions and consumers' demand.

- (d) During the financial year, inventories of the Group recognised as cost of sales amounted to RM683,604,348 (2021: RM488,469,938).

Therefore, allocation of the fixed production overheads of RM1,295,587 were expensed to profit or loss as the production was operating below normal capacity in June and July 2021.

Corporate guarantees given to financial institutions for banking facilities to a subsidiary	#	45,123,594	#	42,805,818

The Company provided corporate guarantee for banking facilities granted to a subsidiary with a limit of RM128,500,000 and USD10,000,000 (2021: RM88,000,000 and USD5,000,000).

The Group designates corporate guarantees given to banks for credit facilities granted to subsidiaries as insurance contracts as defined in MFRS 4 *Insurance Contracts*. The Group recognises these corporate guarantees as insurance liabilities when there is a present obligation, legal or constructive, as a result of a past event, when it is probable that an outflow of resources embodying economic benefits would be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

At the end of each reporting period, the Group assesses whether its recognised insurance liabilities, if any, are adequate, using current estimates of future cash flows under its insurance contracts. If this assessment shows that the carrying amount of the insurance liabilities is inadequate, the entire deficiency shall be recognised in profit or loss.

Recognised insurance liabilities, if any, are only removed from the statement of financial position when, and only when, it is extinguished via a discharge, cancellation or expiration.

The determination of treatment of contingent liabilities is based on management's view of the expected outcome of the contingencies for matters in the ordinary course of the business.

The Directors are of the view that the chances of the financial institutions to call upon the corporate guarantees are remote in view of the financial strength of the Group.

The currency giving rise to this risk is primarily United States Dollar ("USD"). 34. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR AND SUBSEQUENT TO THE END OF THE REPORTING PERIOD

- (a) Since previous financial years, the Government of Malaysia imposed various phases of the Movement Control Order ("MCO") in response to the resurgence of the 2019 Novel Coronavirus infection ("COVID-19") pandemic, followed by the announcement of the National Recovery Plan ("NRP") in June 2021, which details a roadmap to control the COVID-19 pandemic while progressively reopening society and the economic sectors towards the new normal under four progressive phases.

The management has assessed the financial impact on the Group and the Company and are of the opinion that there were no material financial impact arising from the pandemic during the financial year and until the date of the authorisation of the financial statements. In addition, to mitigate its potential risks exposure, the Group and the Company has taken and will continue to take necessary steps to safeguard and preserve its financial condition, emphasising on liquidity management to meet its continuing financial commitments and liquidity needs of business operations.

Based on the assessment and information available at the date of authorisation of the financial statements, the Group and the Company has sufficient cash flows to meet its liquidity needs in the next twelve (12) months after the end of the reporting period. The Group and the Company do not anticipate significant supply disruptions and would continue to monitor their fund and operational needs.

- (b) The Russia-Ukraine conflict resulted in the imposition of various economic sanctions on Russia by several countries across the world. These developments resulted in soaring global commodities and energy prices and supply chain disruption.

As at the date of authorisation of the financial statements, the Russia-Ukraine conflict is still evolving and remains unpredictable. Consequently, the Group and the Company are unable to estimate the financial effects of the situation at this juncture. The Group and the Company are actively monitoring and managing the operations of the Group and the Company to minimise any impact arising from these developments.
